

Polyurethane Filtrate Floss Material Certificate	
quality name	Polyurethane filtrate floss
size	1000*2000*6 mm
aperture	60PPI±3PPI
length\width size tolerance	±2mm OK
thickness size tolerance	±1mm OK
main	1. polyether glycol 2. rigidity polyether glycol 3. TDI Toluene-2,4-diisocyanate 4. Methylene Chloride Silicone Oil 5. Compound 6. pigment etc.
aperture tolerance	±3PPI
consistency kg/m ³ =	25
extend intensity kpa=	14
protraction quotiety %=	61
75%compress permanence distortion %=	6
return spring quotiety %=	38
avulsion intensity %N/CM=	4.5
the rigidity of compress 25% ,%=	50
the rigidity of compress 65% ,%=	95
constringent quotiety 65%/25% =	1.5
resist static quality	1.0*10 ¹⁰
use temperature bound	? 50? ~ 50?
resist acid alkali	PH:5.0~ 8.0
breathe freely quotiety	86%
obstruct wind power	= 102Pa
life	< 5 years
purpose:dustproof, filtrate water, filtrate gas.
